Overview

The *Municipal Elections Act, S.O. 1996*, as amended, grants authority to the Municipal Clerk, as Returning Officer, to establish procedures and forms for voting within their municipality (Section 42(3)(a)). The Act further grants the Clerk authority to provide for any matter or procedure that is not otherwise provided for in the Act, and in the Clerk's opinion, is necessary or desirable for conducting the election (Section 12 (1)).

On March 6th, 2017 Council enacted By-law Number 2726-2017-AP, being a by-law to authorize the Clerk to conduct the municipal elections using a vote by mail ballot process and to authorize the use of automated vote tabulators.

The following procedures detail the process to be followed, as directed by the Clerk, for the 2018 Municipal Election in the Township of Brock.

It is anticipated that these procedures will be amended specifically with respect to certain dates (e.g. mailing of ballots, receipt of ballots, etc.). Pursuant to Section 19 of these procedures, the Clerk has the ability to amend these procedures at any time.

9. Accessible Election Policies/Procedures

- 9.1 Pursuant to the *Municipal Elections Act, 1996*, as well as the *Ontarians with Disabilities Act, 2001* and the *Accessibility for Ontarians with Disabilities Act, 2005*, the Clerk is authorized to establish procedures and provide appropriate measures to ensure that persons with disabilities have equal opportunity to participate in the 2018 Municipal Election. Accordingly, the 2018 Municipal Election in the Township of Brock will be conducted in such a manner as to ensure that:

- Candidates and electors with disabilities have full and equal access to all election information and services; and,
- Persons with disabilities have full access to all Ballot Return Stations.

The Township of Brock is compliant with all regulations of the *Accessibility for Ontarians with Disabilities Act, 2005*. All required documentation is available upon request.

An election accessibility plan regarding the identification, removal and prevention of barriers that impact electors and candidates with disabilities must be prepared and made publicly available prior to voting day. The Township of Brock's 2017-2021 Multi-Year Accessibility Plan, adopted on January 23, 2017, includes the Election Accessibility Plan. Aspects of the plan and additional information is noted below.

Assistance to Electors with Disabilities

- 9.2 Through the use of a mail-in voting system, the Township of Brock is able to facilitate the opportunity for electors to cast their ballot at various locations for extended periods of time during the voting period. Should an elector choose to mark their ballot at the Township of Brock Municipal Office, or simply wish to personally return their completed Voting Kit, rather than through the regular mail, the Township will endeavor to ensure that the process is accessible to those persons with a disability.

Access to Ballot Return Station

- 9.3 The Municipal Office is fully barrier-free with an accessible entrance for persons who have mobility impairments. There are two (2), clearly marked, barrier free parking spaces on Cameron Street (in front of the pharmacy and the municipal office), with adequate curb cuts allowing access to the main floor entrance to the building. The entry area is equipped with marked automatic door openers and the doors are wide enough to accommodate wheelchair and/or scooter traffic. The Ballot Return Station is located on the second floor, accessible via the elevator located inside the entrance. The corridors are kept clear and floors are even and hard surfaced, any doormats or carpeting shall be level with the floor. A designated barrier free private area with adequate lighting and seating and a suitably low writing surface will be made available, should a person with a disability choose to mark their ballot at the Municipal Office.

- (c) The ballot is visible and not enclosed within the Ballot Secrecy Envelope, the Clerk or designated Election Official shall, without examining it, place the ballot within another Ballot Secrecy Envelope.

11. Security of Election Records

Security of the Ballot PRIOR to Voting

- 11.1 Ballots will be printed to required specifications and under the supervision of Dominion Voting Systems and DataFix. The quantity of ballots printed will be forwarded to the Clerk or designated Election Official.
- 11.2 A Voter's Kit including a ballot will be mailed to each person identified on the Voters' List up to **September 7th, 2018** and a record of the number of mailed ballots will be forwarded to the Clerk or designated Election Official.
- 11.3 In addition to the ballots mailed, the Clerk or designated Election Official, will receive approximately **1100 ballots** which will be issued to qualified electors and also used for the logic and accuracy testing of the voter scanner/tabulators.
- 11.4 In the event that there are insufficient ballots provided, upon the authorization of the Clerk or designated Election Official, additional ballots may be printed.

Security of the Ballot During & After the Vote

- 11.5 Upon receiving the yellow prepaid Return Voting Envelopes, by mail or from the Ballot Return Stations, the envelopes will be opened and, upon being verified, the sealed Ballot Secrecy Envelopes will be stored in sealed ballot boxes. At the end of each day, the number of yellow Return Voting Envelopes received throughout the day will be reconciled with the:
 - Number of electors marked as having voted on the Voters' List
 - Number of rejected ballots
 - Number of Ballot Secrecy Envelopes deposited into the ballot box
 - Number of Voter Declaration Forms

The reconciliation results shall be recorded in the Daily Batch Reconciliation Form.

- 11.6 As each ballot box is filled, and at the end of each day, the Clerk or designated Election Official shall affix a seal to the ballot boxes, initial the seal and place the sealed ballot boxes in a secure location under the control of the Clerk or designate. Each morning, the Clerk or designated Election Official shall retrieve any sealed, but not full ballot boxes, inspect the seals to ensure they are intact, and, in the presence of another staff member, break the seals located over the slots for access during the day.

- 11.7 At 2:00 p.m. on **October 22nd, 2018** (Voting Day), the sealed ballot boxes will be transported by the Clerk or designated Election Official from the secure storage location to the Ballot Counting Centre. All ballot boxes shall be maintained at the Voting Day Ballot Return Stations, during the specified hours. At various intervals and, at the close of voting at 8:00 p.m., the ballot boxes maintained at the Voting Day Ballot Return Stations shall be sealed and transported to the Ballot Counting Centre.
- 11.8 When the count is complete, the ballots will be placed in ballot boxes which, when full, will be sealed and initialed by the Clerk or designated Election Official, prior to transferring to a secure storage location under the control of the Clerk or designated Election Official for the statutory retention period.

Disposition of Election Records

- 11.9 As soon as possible after **February 21st, 2019**, the Clerk or designate, shall effect the destruction of the ballots and may also destroy any other documents and records related to the 2018 Municipal Election, pursuant to Section 88 of the Act.
- 11.10 Notwithstanding section 11.9 above,

 - Records shall not be destroyed if a court orders that they be retained.
 - Nomination papers and Financial Statements filed by any candidate shall be retained until the members of the Council or local board elected in the next regular election take office (i.e. after November 15, 2022).

12. Ballot Counting Centre – General

- 12.1 The Council Chambers of the Township of Brock Municipal Office will be established as the Ballot Counting Centre.
- 12.2 The doors to the Township of Brock Municipal Office will be locked at 8:00 p.m. on **October 22nd, 2018**. Only the Clerk, Deputy Returning Officers, designated Election Officials, certified Candidates and authorized Scrutineers will be permitted to remain in the Ballot Counting Centre after 8:00 p.m., and only designated Election Officials will be allowed to enter thereafter. Candidates and Scrutineers leaving the Municipal Office after 8:00 p.m. **will not be permitted to return.**

- 12.3 Cell phones and/or other electronic equipment, inclusive of audio and photographic recording equipment, **will not be permitted** at the Ballot Return Stations or in the Ballot Counting Centre other than for designated Election Officials. Scrutineers and candidates will not interfere with the vote count in any manner. Should they do so, they will be required to leave the facility when so requested by a designated Election Official.
- 12.4 No campaign material will be allowed within or upon the property occupied by the Township of Brock Municipal Office.
- 12.5 The procedures for the proper handling of ballots will be enforced to ensure that each ballot is tracked, stored, and subjected to quality control and that:
- Each ballot is scanned only once;
 - Each scan can be successfully processed for intent; and
 - Spoiled ballots are removed and managed before entering the database.
- 12.6 The Ballot Counting Centre shall have the following stations:

Station	Details
Ballot Secrecy Envelope Opening Station	An electronic letter opener is used to open the Ballot Secrecy Envelopes.
Ballot Extraction Station	Election Officials manually extract the ballot from the Secrecy Envelope, unfold the ballot, and place in a pile for delivery to the Ballot Scanning Station.
Defective Ballot Processing Station	Ballots that are unable to be scanned due to a technical defect are duplicated at this Station.
Ballot Scanning Station	The ballots are scanned in batches and the image processor reads each image to determine voter intent.
Tabulation Station	Batches of scanned ballots are electronically transferred to the Data Acquisition System to be audited and then tabulated for results.
Ballot Transfer Station	Ballots scanned at the Ballot Scanning Station are placed in ballot boxes.
Ballot Storage Station	As each ballot box is filled at the Ballot Transfer Station, it is sealed and transferred to a secure storage facility in accordance with the Act.

13. Ballot Counting Centre – Operational Procedures

- 13.1 At 2:00 p.m. on Voting Day, the sealed ballot boxes will be transported by the Clerk or designated Election Official to the Ballot Counting Centre. At that time, Election Officials will be sequestered in order to commence the ballot processing procedures identified in subsections 13.2 through to and including 13.17, below.

A ballot box(es) will be made available in order to receive Return Voting Kits at the Voting Day Ballot Return Stations until 8:00 p.m. At various intervals, and at the close of voting at 8:00 p.m. the ballot box(es) situated at the Ballot Return Stations will be sealed and delivered immediately to the Ballot Secrecy Envelope Opening Station.

- 13.2 The following steps are repeated until all ballots cast have been processed.
- 13.3 The sealed ballot box(es) will be unsealed and the Ballot Secrecy Envelopes will be opened through the use of an electronic letter opener. The opened envelopes are set aside in bundles to be picked up by the Runner.
- 13.4 The Runner will deliver the opened Ballot Secrecy Envelopes, in bundles of approximately 40 to each Election Official at the Ballot Extraction Station in the Ballot Counting Centre.
- 13.5 Each Election Official, upon receipt of the opened Ballot Secrecy Envelopes, will manually extract the ballot from each Secrecy Envelope, unfold and flatten the ballot, and uniformly place the ballot, face down, in a pile for pick-up by the Runner. The empty Secrecy Envelope will be set aside in a separate pile.
- 13.6 In the event a ballot is accidentally slit by the envelope opener or in the event that a ballot extracted from a Ballot Secrecy Envelope is damaged in such a manner that it obviously cannot be scanned (eg. torn, ripped, crumpled) the Election Official will re-insert the ballot back into the envelope and set it aside for the Runner to deliver to the Defective Ballot Processing Station.
- 13.7 The Runner will regularly attend each Election Official at the Ballot Extraction Station to collect the flattened ballots that have been secured in bundles of 40, deliver them to the Ballot Scanning Station, and will also collect any damaged ballots and deliver them to the Defective Ballot Processing Station.

Scanning Procedures

- 13.8 Upon receiving a batch of 40 ballots to be scanned, the Election Official at the Ballot Scanning Station will, using a new Scan Batch Control Sheet, record the batch number as automatically generated by the software system.
- 13.9 The Election Official will scan the batch of ballots and the image processor will read each image to determine voter intent. If there are no misreads or ambiguous marks detected, the tabulator counter will be compared to the processor counter to ensure that each scanned image has been read correctly. As well, the processor will report the count of the first ballot scanned and this information is verified against the first ballot in that batch to ensure accurate operation of the processor. The details of the scan for the batch are recorded by the Election Official on the Scan Batch Control Sheet.
- 13.10 In the case of a technically damaged or defective ballot, the image processor will report a misread, cease scanning, and report the location of the ballot for removal. The damaged/defective ballot will be isolated for action by the Clerk, or designated Election Official (either a second attempt at scanning, or delivered to the Defective Ballot Processing Station by the Runner). In the case of a ballot that is technically defective Dominion Voting Systems has calibrated the tabulator to identify marks that are under the threshold value but within a defined range of pixels as an ambiguous mark. The Clerk, or designated Election Official, shall verify the suitability of this calibration through the Logic and Accuracy Testing. The batch will be rejected and completely rescanned without the offending ballot(s).
- 13.11 Once the batch is successfully scanned and the Election Official has completed the Scan Batch Control Sheet, the Election Official shall place the batch within an envelope labeled "Tabulator # ____, Batch # ____" with the Scan Batch Control Sheet and place same in the next available ballot box at the Ballot Transfer Station. The Batch will be stored without paperclips or elastics. The copy of the Scan Batch Control Sheet will be placed in the folder provided.
- 13.12 When a ballot is reported as a misread or ambiguous mark by the image processor and it is determined by the Clerk, or designated Election Official, that the ballot was rejected due to a technical defect, that ballot will be delivered to the Defective Ballot Processing Station by the Runner.
- 13.13 Upon receipt of the technically defective ballot, the Election Official will, using a new unused ballot, prepare a Replacement Ballot by marking the new ballot with the same marks contained in the designated voting spaces on the technically defective ballot, and the Replacement Ballot will be

clearly labeled “replacement” and given a serial number which will also be recorded on the defective ballot. (ie. Replacement #1 / Defective #1, Replacement #2 / Defective #2, etc.). The annotations on the Replacement Ballot must be recorded only on the bottom edge of the back of the ballot.

- 13.14 The replacement ballot will be delivered by the Runner to the Ballot Scanning Station to be included in a batch for scanning.
- 13.15 The defective ballot will be placed in a “Defective Ballots” envelope.
- 13.16 If a ballot is rejected by the vote scanner/tabulator because it is not a Township of Brock ballot, the ballot will not be scanned and will be returned to the Ballot Extraction Station for placement in the ballot box labelled “Rejected Ballots”.
- 13.17 The Runner will regularly collect the empty Ballot Secrecy Envelopes and discard them into the designated waste receptacles.

Tabulation Procedures

- 13.18 As soon as possible after 8:00 p.m., each scanned ballot will be electronically tabulated at the batch level, validated and published by the Clerk or designated Election Official. By publishing the batch, the batch level results are then added to the cumulative unofficial results.
- 13.19 The unofficial results will be forwarded to the Rick MacLeish Memorial Community Centre and the municipality’s website:
www.townshipofbrock.ca.

14. Alternative Voting Equipment

Scanner/Tabulating Equipment

- 14.1 Dominion Voting Systems will supply the scanning/tabulating hardware required to scan and tabulate the ballots for the 2018 Municipal Election. Two (2) centralized Optical Scan Ballot Tabulators will be used to scan the ballots and a PC attached to each scanner/tabulator will accumulate the data. In the event that one of the PC’s affixed to the scanner fails, the remaining scanner and PC shall be used exclusively to scan the ballots.
- 14.2 Dominion Voting Systems will supply the Democracy Suite software package required to design ballots, scan ballots, tabulate results, audit ballot tabulation, display results and produce Election Results reports. This software system will reside on a PC located in a secure location in the Clerk’s Department.

Programming of the Hardware & Software

14.3 The scanner/tabulator hardware and software will be programmed so that:

- a printed record of the number of votes cast for each candidate will be provided;
- an appropriate threshold value will constitute a valid vote based on calibration;
- a ballot that is damaged or defective or has been marked in such a way that it cannot be properly processed by the scanner/tabulator, will be returned to the Election Official with the message “Misread Ballot”;
- a ballot that contains a mark under the threshold value but within a defined range of pixels in the designated area beside the candidate’s name will not be processed by the scanner/tabulator, will be returned to the Election Official with the message “Ambiguous Mark”
- the scanner/tabulator will stop when it encounters a damaged or defective ballot or a ballot with an ambiguous mark;
- an over-voted race (i.e. where more votes are marked on a ballot than are allowed) will not be counted. The remaining races that have been properly voted on that same composite ballot will be counted;
- an under-voted race (i.e. where fewer votes are marked on the ballot than are allowed) will be counted; and,
- a blank ballot (i.e. no votes indicated in any race on the composite ballot) will be counted as a declined ballot.

Testing of Hardware & Software

14.4 Prior to Voting Day, the Clerk, in the presence of an Election Official, will have the scanner/tabulators tested to ensure that they will accurately count the votes for all candidates that are marked with a pen/pencil and with a valid mark in the designated area. This test shall be known as the Logic and Accuracy Test.

14.5 Adequate safeguards will be taken to ensure that the system, or any part of it, that is used for scanning, processing, and tabulating votes is isolated from all other applications or programs and that no remote devices are capable of gaining access to the system.

14.6 After programming the software and scanner/tabulators, the testing will be conducted as follows:

- scan and tabulate a pre-audited group of ballots marked with a variety of marking tools, including ballots that fall into each of the following categories:

- ballots on which are recorded a pre-determined number of votes for each candidate;
 - ballots that have over-voted races;
 - ballots that are unreadable;
 - ballots that contain an ambiguous mark;
 - ballots that have no votes recorded.
- compare the output of the tabulation with the pre-audited results.
- 14.7 If the Clerk, or designate, detects any error in the test, the cause of the error will be ascertained and corrected and the test will be repeated until an errorless count is made and certified by the Clerk, or designate.
- 14.8 The Clerk will, at the completion of the test, retain the programs, test materials and ballots in a sealed envelope with the remaining election materials and records in accordance with the *Municipal Election Act, S.O. 1996*, as amended.

Re-Testing of Election Hardware & Software

- 14.9 If the scanner/tabulator fails, the batch that is currently being scanned will be set aside until such time as the scanner/tabulator is operational. In the event that a scanner/tabulator malfunctions during the counting process, it may be necessary for an adjustment on the scanner/tabulator. Paper jams, multi-feeds, and other minor interruptions will not be considered malfunctions and will not require that the system be re-tested.
- 14.10 Upon becoming operational again, the following procedure is to be followed to verify that the problem has been rectified on the repaired scanner/tabulator and that the equipment is scanning and reading correctly:
- a) The Clerk will have prepared, prior to the commencement of the scanning, a pre-audited group of ballots similar to the pre-audited group of ballots as provided in Section 14.6 above.
 - b) The Clerk, or designate, will review the digital image of each ballot and verify that the scanner/tabulator is reading the ballots properly.
 - c) The test batch is then scanned as a test to verify that the system is scanning correctly. This process will be done using a replica of the database that will reside on a separate computer which is not connected to the actual election database, so that the results of the testing are not in any way combined with the actual election results.

- d) If the results indicate that the scanner is now performing correctly, the test results are removed from the replica database and the test ballots are sealed in an envelope and labeled as “test deck ballots” and the time of the test.
- e) The scanner/tabulator will now be ready to resume production.

Auditing and Transparency

14.11 Dominion Voting’s patented system stores a complete image of every ballot processed, together with an audit trail for that ballot which is visually affixed to the image. This trail shows how the scanner/tabulator interpreted the ballot and, by viewing this image, it can be easily verified that the tabulator has correctly interpreted the voter marks on the ballot. This ballot audit trail image can be used as:

- a method to test machine integrity prior to the election; and
- a method of obtaining confidence that the equipment is functioning properly.

15. Scrutineers & Candidates

15.1 Candidates may appoint scrutineers in writing, on the designated form, to represent them.
